DETAILED ACTION

1. This is in response to the Applicant's amendments and arguments filed on June 20, 2006 in which claims 2, 3, 5, 8, 10, 12, and 12-14 have been amended; claims 1 and 7 have been canceled. Claims 2-6 and 8-15 are currently pending.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's arguments and amendments, claims 2-6 and 8-15, renumbered as 1-13, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the prior arts teach automatic registration of a communication device of a caller upon receiving a call; the prior arts further teach extracting the phone number of a caller from an SMS message for storing. On the other hand, the Applicant teaches checking whether or not an address information registering message service is available for registration, when it is not available transmitting a return message from the called mobile communication terminal to the originating mobile communication terminal and informing the originating mobile communication terminal that registration of the address information is not accepted. These limitations, in conjunction with all limitations of the independent claims have not been disclosed, taught, or made obvious over the prior art of record.

The Applicant further teaches waiting for an originator's selection of a menu of 'sending address information'; displaying an input screen and receiving the address information to be added to a content of a short message by the originator's input; and

generating the address information registering message by adding the identifier to the short message and transmitting the generated address information registering message to the called mobile communication terminal. These limitations, in conjunction with all limitations of the independent claims have not been disclosed, taught, or made obvious over the prior art of record.

The Applicant further teaches receiving a short message from the originating mobile communication terminal and checking whether the short message is the address information registering message by extracting the identifier from the short message; searching the called mobile communication for availability; checking whether or not an automatic storage function for the address information is set up; extracting the address information from the address information registering message received from the originating mobile communication terminal and checking whether or not the extracted address information exists in the address book of an internal memory; and registering the extracted address information with the address book of the internal memory when the extracted address information does not exist in the address book of the internal memory. These limitations, in conjunction with all limitations of the independent claims have not been disclosed, taught, or made obvious over the prior art of record.

The Applicant further teaches wherein said checking whether or not the address information registering message service is available, comprises: receiving a short message from the originating mobile communication terminal and checking whether the short message is the address information registering message by extracting the identifier from the short message; checking whether or not the address information

registering message service is available at the called mobile communication terminal through terminal information registered with a database; and transmitting the address information registering message received from the originating mobile communication terminal to the called mobile communication terminal. These limitations, in conjunction with all limitations of the independent claims have not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
